MİPSAN

Mipsan has been a manufacturer of textile machine components since 1970. In its successful history, the company has been focussed on production of spare parts and the combination of values in terms of quality, competitive pricing, reliable delivery, production flexibility and innovation.

Furthermore, honesty and responsibility have been accepted as basic principle.

Our company is managed by a well-qualified and fully trained team of professionals who can adapt and meet the quality standards. We can develop mold construction at short notice, thanks to our own development and design department.

We don’t think ourselves as just a textile supplier because we are also your strategic partner. On this way, we are essentially looking to build long term relationships with our pertners rather than short term opportunistic exploitation of individual transaction terms.

We look forward to meeting you!
